- 3.6mm fixed lens
- 12 VDC power requirement
- Comes with plug and play cables
- Includes easy connection instructions

**Includes 1 year warranty and a
30 day money back guarantee.**

Versatile and Unobtrusive

Our tiny MD4 and CD4 micro dome video cameras are slightly smaller than our popular MD1 and CD1 microdomes and offer more versatility on where they can be placed to get that exact view that you are looking for. The MD4 is our black and white version of this dome and has a sharp resolution of 410 lines and a low lux light rating at a stealthy 0.5. The CD4 color version resolution is 400 lines with a low lux light rating of 1.0.

Features of Both Domes

Both our MD4 and our CD4 measure a tiny 2.42" in diameter and 2.35" in height. Convenient pan and tilt adjustments located under the dome allow pointing the camera in almost any direction. Additional features include a top of the line Samsung CCD chipset for our MD4, while the CD4 has the latest 1/4" Panasonic CCD. Both give you the full array of automatic features and a 3.6mm fixed lens. Comes with connection instructions, pre-installed plug and play cables, a one year warranty and a 30 day money back guarantee.
