- 720 x 480 @ 30 frames per sec
- 3.8 - 9.5mm varifocal zoom lens
- 2 way audio
- MPEG-4 compression
- Motion detection

Includes a 1 year warranty.

The Future of Surveillance

For years DVRs have been remote viewable via the internet. IP is simply the evolution of this, making independent cameras remote viewable in the same way. IP cameras in your system can now be located across the room, or across the world. Our hybrid IP / analog video surveillance solution allows you to migrate to IP at your own pace, and purchase only the components required.

IPC7 & IPC8

The IPC7 and IPC8 security video cameras can see in the dark, and provide high quality video in almost any location. The IPC7 features a cost effective, high quality CMOS sensor. The IPC8 CCD outdoor surveillance camera is weatherproof, and features a varifocal lens. Both cameras offer full D1 resolution, at a full 30 frames per second video. Both cameras also come with a one year warranty.
