

Ultra Small 900MHz Receiver

Wireless video receiver with antenna and power supply

The wireless video receiver has standard RCA-type audio and video outputs, and F-type antenna connector. Size is 7.5" X 1.33" X 5.25". These are some of the best wireless video values we've ever offered...you get the "locked on" crystal clear performance of an IC controlled FM synthesized receiver design, the efficient 900 megahertz band, combined with the drift-free signal reception of a phase lock loop receiver.

KEY FEATURES

- » 12 volts DC, 350 milliamps
- » RCA-type audio and video outputs
- » F-type antenna connector
- » Six month warranty
