

## 2-Camera Digital Interview Room System

*Scalable system for both multi-room and multi-facility needs*

This interview system comes equipped with wall-mount switches that can be easily mounted outside each room. Simply start and stop recordings and notify others of the interview in progress with the flip of a switch. Designed with law enforcement professionals in mind, our interview system is easy to use and operate with hassle free evidence management, remote management and easy system expansion. Our simple to use system software is built on the familiar MS Windows OS and makes even advanced operations seen elementary to perform. Evidence can be quickly searched and located by time, event or with the fast review bar. It can also be exported from the recorder itself or with any computer that has the free remote viewing software. Users can take advantage of the pre-installed Nero authoring software and DVD burner to produce ready to play disks compatible with any DVD player. Users can also export recorded video as .AVI files or as a proprietary file for potential forensic authentication.

### KEY FEATURES

- » 8 channel hybrid DVR accepts up to 4 analog cameras, 4 audio signals, and 4 IP cameras
- » System can be programmed to email supervisors when interviews begin
- » Live interview footage, recorded interviews and files can be downloaded remotely with the remote management software
