

SG Home Quick Set-up Guide

Download SG Home app.
Remove camera from box.
If battery powered charge battery pack for 10 hours.
AC outlet powered cameras may be plugged in immediately.

Click '+' to add camera.

Apple users: Apple chooses network your device is currently on.

Select SG Home Camera ID

Apple users: Exit SG Home app and go to iOS Settings. Select SG Home Camera ID from iOS wi-fi menu.

Enter your wi-fi password

Apple users: Look for wi-fi symbol in status bar on iPhone. Return to SG Home app. Enter wi-fi password and click Next. Follow onscreen instructions to create camera password.

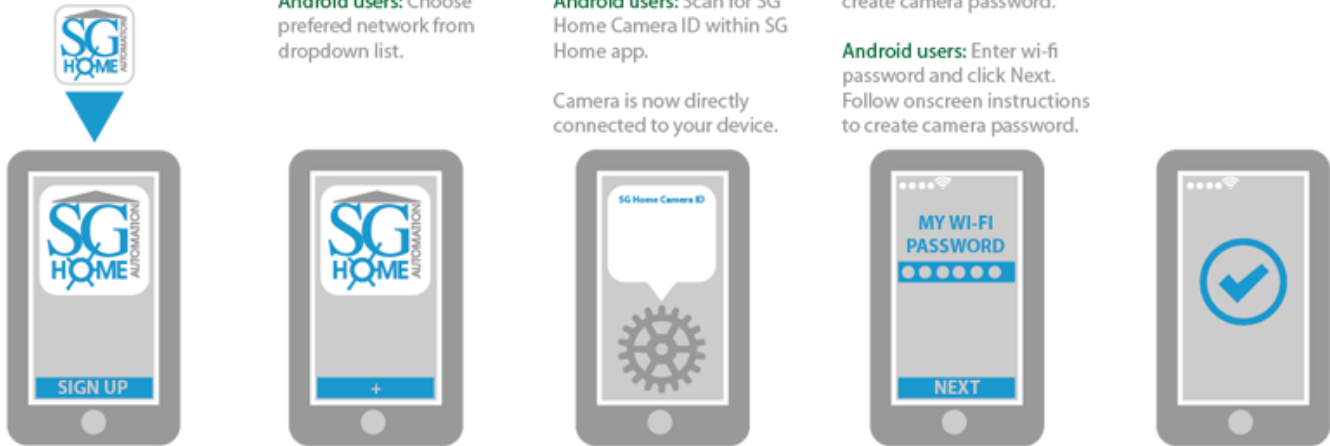

Checkmark indicates set-up complete. Go to SG Home Camera List to begin viewing real time video.

Android users: Choose preferred network from dropdown list.

Android users: Scan for SG Home Camera ID within SG Home app.

Camera is now directly connected to your device.

Android users: Enter wi-fi password and click Next. Follow onscreen instructions to create camera password.

SG Home Wi-Fi Quick Set-up Guide (Battery Powered)

Step 1. Open the SG Home™ camera to insert memory card into the memory card slot (if not already inserted from factory) ,charge the battery pack first for approximately 10 hours for a full charge, once charged plug in and power on the camera.

Step 2. Download the "SG Home" App from Apple Store or Google Play to your smartphone or tablet.

Step 3. After logging into the SG Home App, click "+" bottom right of the screen to add your camera. Follow the on-screen instructions to select your wireless network:

Apple devices: the App chooses the network your device is connected to; if necessary, temporarily leave the app to switch networks on your device prior to entering the network password

Android devices: select the network from the drop down list in the App; if necessary, click "Scan" to search for available networks

Step 4. Follow the on-screen instructions to select your camera's network(ex. Device_KJxxxxxxx) to set it up with your network's credentials:

Apple devices: temporarily leave the App to switch networks to the camera's network and wait for the wi-fi signal-strength meter to return in the status bar, then return to continue setup

Android devices: select the camera's network from the drop down list in the App; if necessary, click "Scan" to search for available networks

Step 5. Wi-fi Setup is complete when you see the green check mark. You may now return to SG Home Camera list and begin viewing real time video.

All devices: there may be a few seconds delay while your device reconnects to your network and the App logs back in to the servers to retrieve your camera list.
